Technology Note

ALERT ALERT STIClassroom

I've noticed that several of you are having problems with your STI screens getting TOO BIG making it hard to use everything. Here is the fix:

❖ Right Click on My Computer (in the Start menu screen)
❖ Select Properties (at the bottom)
❖ Click on the Advanced tab (at the top)
❖ On the screen find the Performance area and click on Settings
❖ Scroll to the bottom of the list and uncheck the options that says—use visual styles on windows and buttons
❖ Click on Apply and don't be alarmed if the color fades and it seems that nothing is happening—it will continue
❖ When the cursor returns, click OK

Call me if you need help…..
